OPERATIONAL SUPPORT

CORE SERVICES

ROV Inspection

Work-class and observation-class ROV inspection of pipelines, risers and subsea structures.

Pipeline Integrity

External & internal corrosion mapping using phased array, ACFM and eddy current.

Subsea Repair

Clamp installation, weld repair, cathodic protection retrofit and structural reinforcement.

Asset Data & Reporting

Inspection value analysis and integrity dashboards delivered through client portals.

WHY SUBSEA SOLUTIONS

- Local Perth team — rapid mobilisation across WA basins and Timor Sea assets.
- Vessel & spread agnostic — we work with the right asset for your scope, not ours.
- Data-first delivery — every inspection paired with an integrity reporting product.
- QHSE-led — ISO 9001, ISO 14001 and ISO 45001 aligned management system.

SECTORS WE SERVE

- Offshore oil & gas operators — production phase integrity management.
- FPSO and floating asset owners — mooring and hull inspection campaigns.
- Subsea cable & pipeline operators — route surveys and post-lay inspection.
- Offshore wind developers — foundation, cable and scour monitoring.

INDICATIVE CASE STUDY

North-West Shelf Pipeline IRM Campaign

Delivered a 6-week pipeline inspection and minor-repair campaign 180 km offshore on a producing gas asset. Coordinated ROV operations, NDT crews, and reporting team across a single mobilisation window.

Outcome: zero LTIs, 100% scope completion, integrity report delivered 4 days ahead of schedule.

ENGAGEMENT MODEL

- Framework agreements with call-off pricing for repeat clients.
- Project-based scopes with fixed-price or schedule-of-rates options.
- Embedded integrity engineer secondments on request.
